PROFESSIONAL PROFILE

As someone who has recently graduated from a software engineering program, I'm now on the lookout for an apprenticeship where I can further develop my technical skills and contribute to the success of a project. My passion for tech all began from editing videos in Windows Moviemaker to coding an interactive story in a popular mobile app (Episode Interactive). Considering my previous art background and my passion for tech, I'm very interested in web development. I would enjoy the responsibility of setting the layout and design of a website as well as content creation.

KEY SKILLS

- SCRUM
- Creative thinking
- UI Design
- Independent
- Collaborative
- Self-motivated
- Detail-oriented
- Great Communication
